LIGHTLAB INTERNATIONAL
AGI32 Course Schedule

Australia / New Zealand - AGI32 Training Schedule
Register your interest or book with : toby@lightlabint.com
We are taking expressions of interest to help us prepare the next training session.

* Second and subsequent trainees from the same company are eligible for the discounted price. IES members are eligible for the discounted price. For Australian companies, the prices quoted are ex-GST.

1. Dates are subject to change without notice

2. Regular courses will be confirmed as proceeding subject to reasonable attendance numbers. Brisbane a minimum of 6, all other locations require a minimum of 10 attendees. We can organise smaller private training sessions at our Brisbane office or your location.

3. AGI32 Intro/ Intermediate training courses are aimed towards training users to utilise the agi32 software as technical design tool. It is designed as an overview of the software and it's functions,it does not and cannot focus on any one module of the software. ie. road lighting, daylighting. These and other features of the software are covered in a general overall brief within the training schedule. The course is not designed to teach general lighting principles, in attending an AGI32 training course we assume trainees will have a reasonable knowledge in basic lighting principles.

4. In house training courses can be arranged. Please contact us for more information.
